Crane ChemPharma & Energy: Pacific Cast Steel Valves

11 Apr 2017

Designed in accordance with the industry's latest standards, the new Pacific®CSV line of cast steel gate, globe and check valves from Crane ChemPharma & Energy provides quality performance in demanding applications.

The new line has several improved features that enhance reliability and O&M including the gate valve's fully-guided wedge, which ensures smooth operation in both horizontal and vertical orientations to deliver improved resistance to sticking. The globe valve has a uniquely-designed line contact between disc and seat, which enables lower seating torque and faster set up. The swing check's disc fastener, is restrained by the bonnet to eliminate the risk of a displaced disc and prevent damage to downstream equipment.
