Crane ChemPharma & Energy announces new API-624 compliant Pacific® Cast Steel line of Gate, Globe and Check Valves!

April 11, 2017 782 0

SHARE

Designed in accordance with the industry's latest standards, the new Pacific®CSV line of cast steel gate, globe and check valves provides the highest level of quality and performance in demanding applications.

The new line has several improved features that enhance reliability and O&M including:

1. The gate valve's fully-guided wedge, which ensures smooth operation in both horizontal and vertical orientations to deliver improved resistance to sticking.
2. The globe valve's uniquely-designed line contact between disc and seat, which enables lower seating torque and faster set up.
3. The swing check's disc fastener, which is restrained by the bonnet to eliminate the risk of a displaced disc and prevent damage to downstream equipment.
